# OVERVIEW

RXC Games is a crypto gambling platform set to change the world of crypto gambling. RXC Games token is built on Binance Smart Chain (BSC), as we are aiming for ultra-fast BSC transactions with low fees to ensure the complete joy of playing.

RXC Games token is currently trading on PancakeSwap Decentralised Exchange and XT.com Centralised Exchange.

What started as a friendly bet on a game night, continued to be an idea and in the end turned out to be an online casino up to date with the latest games including live games, with a total number of over 4000 games. We are fully licensed with around 80 top providers including Playtech, Microgaming, Playson, Konami, and others. We are regularly adding new providers.

To ensure that every player finds something for themselves, 4000 games are divided into 6 different categories: Slots, Live Casino Games, Arcade, Virtual Sports, Blackjack, and Roulette. Create a unique gaming experience and introduce Blockchain technology to users in a fun way.

We are aiming to eliminate unnecessary complications to simplify casino games for the crypto scene through ease of UI and unified token.

No KYC, no geo-restrictions - everyone is welcome.

# STAKING

Staking often requires a lockup or "vesting" period, where your crypto can't be transferred for a certain period. This can be a drawback, as you won't be able to trade staked tokens during this period even if prices shift. But even if you're just looking to earn some staking rewards it's useful to understand at least a little bit about how and why it works the way it does.

Most important thing is to understand that this is not a traditional staking system, as we are sharing our vested tokens and platform revenues with our stakeholders. RXC Games platform is aiming to create a healthy ecosystem with many new implementations, but with community involvement in the entire project.

The steps are easy:

- 1 Install Metamask/TrustWallet
- 2 Connect to the BSC network
- 3 Buy RXCG tokens on DEX or CEX
- 4 Connect to Staking Smart contract
- 5 Choose the amount and period of staking
- 6 Claim RXCG tokens

## Important information:

- Do not send RXCG tokens directly to the staking contract, only use the provided user interface! Any tokens sent directly will be lost.
- Single addresses can have only one active stake. Multiple stakes per address are not allowed. Stakes cannot be replenished after they are created.
- There is an option to un-stake your tokens before the staking period has ended. But that comes with a specified penalty.
- It is your responsibility to claim RXCG tokens after the staking period ends. RXCG tokens will not be transferred to your address automatically when the staking period ends. Please use the provided user interface for claiming.

## WHERE IS RXCG LISTED?
